

**Commercial Coffeemaker**

**Energy Saver Pour-Over Brewer  
Part# ES18**

**Operating Instructions**

**Electrical Rating 1400W, 120VAC, 11.7A**

# **IMPORTANT SAFEGUARDS**

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock and/or injury to persons, including the following:

1. Read all instructions before operating or using the appliance.
2. Do not touch hot surfaces. Use handles and knobs.
3. To protect against electrical shock, do not place cord, plugs or appliance in water or other liquid.
4. Close supervision is necessary when any appliance is used by or near children.
5. Unplug from outlet when brewer is not in use and before cleaning. Allow to cool before putting on or taking off parts and before cleaning the appliance.
6. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner.
7. Do not let cord hang over edge of table or counter, or touch hot surfaces.
8. Do not place on or near a hot gas or electric burner or in a heated oven.
9. Do not move entire unit when appliance is on or when thermal carafe contains hot liquids.
10. Do not use appliance for other than intended use.
11. **WARNING:** To reduce the risk of fire or electric shock, do not remove bottom cover. No user-serviceable parts are inside. Repair should be done by authorized personnel only.
12. Use on a hard flat level surface only to avoid interruption of airflow underneath appliance.
13. Special instructions for the thermal carafe:
  - A. The thermal carafe is designed for use with this appliance only. It must never be used in any other drip-type brewer, on range top or in a microwave oven.
  - B. Do not set a hot thermal carafe on a wet or cold surface. Do not put thermal carafe in water. Do not place on hot surface. Do not place in dishwasher.
  - C. Do not use a cracked thermal carafe or a thermal carafe having a loose or weakened handle.
  - D. Do not clean thermal carafe with cleaners, steel wool pads or abrasive material. Do not place sharp or hard objects in the thermal carafe.

# **SAVE THESE INSTRUCTIONS**

## **SPECIAL CORD SET INSTRUCTIONS**

A 5 foot power-supply cord is provided to reduce the risks of becoming entangled in or tripping over a longer cord. Extension cords are available and may be used if care is exercised in their use. If an extension cord is used, the marked electrical rating of the extension cord should be at least as great as the electrical rating of the appliance, and the cord should be arranged so it will not drape over the counter top or table top where it can be pulled on by children or tripped over.

This appliance has a grounded plug (3 prong). It is not polarized and can fit into an outlet only one way. If it will not fit your outlet contact a qualified electrician. Do not modify the plug in any way.

## **IF SERVICE IS REQUIRED**

Contact your distributor. To assist in serving you, please have the model number (ES18), date of purchase, and serial number (if available) prior to calling.

## **INTRODUCTION**

Your thermal carafe brewer brews fresh, filtered coffee in minutes. It can also easily heat water for instant beverages. The thermal carafe contains a vacuum liner which delivers the best heat retention of all containers used with drip brewers and allows the full flavor of the coffee to be retained.

## **PREPARATION FOR USE**

Before the first use, clean the thermal carafe and brewer by completing a brew cycle as described below without using coffee or a coffee filter.

## **COFFEE PREPARATION**

1. Place brewer on a solid flat surface. Plug into 120V outlet.
2. Open thermal carafe lid by turning it in the direction of "OPEN" arrow and lifting off. Fill the thermal carafe with cold, fresh water to within 1 inch of the rim. Open hinged water reservoir cover; pour water into reservoir opening. Markings on water level indicator show amount of water needed to make the desired number of cups of coffee. **DO NOT EXCEED THE 12-CUP LEVEL ON THE WATER LEVEL INDICATOR.** Close reservoir cover.
3. Before thermal carafe is returned to platform, pre-warm carafe by running warm water through carafe. In addition to preventing damage to the liner, pre-warming the carafe will also help keep the coffee warmer longer.
4. Return lid to thermal carafe. To close lid, turn lid in direction of "CLOSE" arrow until lid fits tightly on carafe. Return empty thermal carafe to brewing platform. Be certain thermal carafe lid is in "CLOSED" position and is securely in place during brew cycle.
5. Open filter basket by grasping basket handle and swinging outward. Insert a filter into filter basket; assure filter fits snugly in basket. Use a fresh filter for each carafe of coffee.
6. After placing ground coffee or tea into filter, return basket to closed position. To assure safe operation, make sure basket is closed securely.
7. With thermal carafe and basket securely in place, press green "BREW" button; orange LED will light. CAUTION: Brewer becomes very hot during brew cycle; handle with extreme care as hot parts and escaping steam may cause burns.
8. The brew-through lid allows coffee to drip from brewer through closed lid. When coffee has completely stopped dripping into thermal carafe and water level indicator is empty, brew cycle is complete.
9. An audible "beep" tone will signal when the brew cycle is complete. Brewer will switch off automatically.
10. After coffee grounds have cooled, carefully open filter basket and discard used coffee filter and grounds. To remove filter basket from brewer, grasp basket handle and swing basket outward, and with basket in far right position, lift up and pull basket hinge.
11. The personal carafe has a brew-through lid which allows coffee to be poured with the lid in the "CLOSED" position so coffee freshness and temperature can be preserved. NEVER POUR LIQUID FROM THERMAL CARAFE UNLESS LID IS IN "CLOSED" POSITION.

## **PAUSE & SERVE**

This feature allows a cup of coffee to be poured before the brew cycle has finished. Carefully remove thermal carafe, and the Pause & Serve feature will be automatically activated, temporarily stopping the flow of coffee into the thermal carafe. Return thermal carafe to platform immediately after pouring coffee, and the brewing process will resume.

**IMPORTANT:** Carafe must be returned to its brewing position within 30 seconds to prevent the filter basket from overflowing.

**NOTE:** Strength of coffee poured mid-cycle may vary from the finished brew.

**CAUTION:** During brew cycle, basket must be closed securely as basket in improper position may cause hot water or coffee to overflow.

## **CLEANING AND MAINTENANCE**

### **Daily**

Always unplug brewer and allow to cool before cleaning. Wash filter basket and carafe lid in hot, sudsy water. Rinse inside of thermal carafe with lukewarm water. Wipe brewer and outside of thermal carafe with damp cloth and dry. Never put brewer or thermal carafe in water or in the dishwasher. For hard to remove stains, use a plastic mesh pad or a cloth dampened in vinegar. Do not use metal cleaning pad or abrasive cleaners.

### **Monthly**

Minerals found in water can clog brewer or reduce its efficiency. To prevent this use Urnex Dezcal. Add Dezcal and water mixture to water reservoir. **DO NOT OVERFILL.** Place empty thermal carafe (with lid securely closed) on platform and press "BREW" button. After mixture has been cycled through, press "OFF" button. Rinse by cycling through 2 or 3 more carafes of plain cold tap water. Do not pour any liquid other than cold tap water or Dezcal mixture into reservoir opening when cleaning.

## **PRECAUTIONS**

1. Do not place a cloth or otherwise restrict airflow beneath the brewer.
2. To avoid accidents, make sure thermal carafe lid is in "CLOSED" position during brewing and while pouring; do not pour in the direction of people.
3. When pouring, hold thermal carafe by the handle only.
4. CAUTION: Burns may result from spilled, hot liquid and/or contact with hot parts.

## **THERMAL CARAFE PRECAUTIONS**

Your thermal carafe contains a vacuum liner. Improper use will damage the liner. Please follow these instructions:

1. Clean inside of carafe with lukewarm water. Turn carafe upside down and allow to dry.
2. Never clean inside of carafe with a hard implement, scouring pad or other abrasive cleaners; rinse only with water.
3. Never insert your hand into carafe for cleaning.
4. Never stir inside of carafe with a spoon or other utensils.
5. Never fill carafe to the rim. Fill to a maximum of one inch from the top of liner.
6. Before adding very hot or very cold liquid to carafe, first rinse with warm or cold water, depending upon what is being prepared.
7. Never use ice cubes in carafe.
8. Never fill carafe with carbonated beverages.
9. Never drink directly from carafe.

## **WARRANTY**

BrewTek ES18 brewers are warranted against defects in workmanship or materials, under normal use, for 90 days from the date of purchase. Liability in all events is limited to the purchase price paid and liability under the aforesaid warranty is limited to replacing or repairing any part or parts which are defective in material or workmanship, and returned to our factory, shipping cost prepaid. No warranty expressed or implied, other than the aforesaid is made or authorized by BrewTek, LLC. Prompt disposition will be made if item proves to be defective, within warranty. Before returning any item, write or call the dealer, from whom the product was purchased, giving model number, serial number, and date of purchase, and describe the nature of the defect. If damage was incurred during transit to you, file claim with the carrier.
